

Attention all Scholars of Gender and Women's Studies: Get Online!!!
<http://www.weave-network.eu>

WeAVE is a European women's and gender studies network for students, postgraduate students, PhDs, post-doc researchers, and junior teachers. The aim is to network, to get gender and women's studies students talking, communicating, and sharing many different forms of feminist knowledge.

The **WeAVE website** contains a forum with discussion rooms, a search facility which allows members to search for others who may be involved or interested in similar research areas. The WeAVE website also operates as an information portal, with detailed listings of current news and events, online links to women's studies institutions, associations, and online resources.

The name **WeAVE** incorporates two thematic lines which define our network organisation. The image of weaving refers to the connectivity and interaction which WeAVE aims to create. Similarly, the WAVE capitalised in the title points towards a new third wave feminist generation, the future of European gender studies.

Welcome to **WeAVE**, please log on and have a chat!!
